SECURITY CLASSIFICATION GUIDE  
Operations  
ENDURING FREEDOM & NOBLE EAGLE

1. Purpose. This document provides instructions and guidance on the classification of information involved in Operation ENDURING FREEDOM and Operation NOBLE EAGLE. It is designed to establish the minimum classification required for information related to the current operation and homeland security. Previous guidance established by the U.S. Central Command, Joint Staff, the Intelligence Community and others are annotated as derivative actions; i.e. readers shall coordinate with the principal office of record for any questions, actions, or modification of their original decisions.
2. Authority. This guide is issued under the authority of the Assistant Secretary of Defense, Command, Control, Communications and Intelligence (ASD(C3I)) and is in accordance with DoD 5200.1-R, "Information Security Program" and the provisions of Executive Order (EO) 12958, "Classified National Security Information." This guide shall be cited as the basis for classification, reclassification, or declassification of information and materials related to Operations ENDURING FREEDOM and NOBLE EAGLE under DoD cognizance and control.<sup>1</sup> Changes in classification guidance required for operational necessity will be made immediately upon notification and concurrence of the Office of Primary Responsibility (OPR).

Classification decisions based on previous guidance (e.g. intelligence information or major weapon systems) shall cite the originating agencies' determination. This guide includes references to those areas as a convenience to the reader and is not intended as a supplement or replacement guide.

The guidance is applicable to information generated by and in support of the Department of Defense in executing the specified operations.

To expedite mission support, this guidance is effective immediately. Recommendations for changes, additions or deletions should be forwarded to the OPR (see paragraph 3).

---

<sup>1</sup> Sharing information with coalition partners is subject to provisions of the National Disclosure Policy and international security agreements under the cognizance of USD(P). See DoDD 5230.11 for additional guidance.

**FOR OFFICIAL USE ONLY**

3. Office of Primary Responsibility (OPR). This guide is issued by and all inquiries concerning contents and interpretations as well as recommended changes should be addressed to:

Classification authority will transition to the Executive Agent for Homeland Defense or the Operational Theater Commander without prior notification or coordination.

4. Classification Challenges. If at any time, any of the security classification guidance contained herein is challenged, the items of information involved shall continue to be protected at the level prescribed by this guide until such time as a final decision is made on the challenge by the appropriate authority. Classification challenges should be addressed to the OPR. Appeal procedures to classification determination are found in DoD 5200.1-R.
5. Reproduction, Extraction and Dissemination. Authorized recipients of this guide may reproduce, extract, and disseminate the contents of this guide, as necessary, for application by specified groups involved in Operations ENDURING FREEDOM and NOBLE EAGLE, including industrial activities. Distribution of this document is in accordance with DoDD 5230.24, "Distribution Statements on Technical Documents." Distribution Statement C limits distribution to U.S. Government Agencies and their contractors only. All other requests should be forwarded to the OPR.

The Joint Staff will ensure copies of this guide are immediately disseminated to the Combatant Commands.

6. Public Release. Even though this guide shows certain details of information to be unclassified, that information is not automatically authorized for public release. Official DoD information intended for public release must be reviewed for clearance in accordance with DoD Instruction 5230.29, "Security and Policy Review of DoD Information for Public Release." The first mechanism for public release is the Assistant Secretary of Defense for Public Affairs and their Component counterparts. **Warning: It is imperative that all information be processed through official security review channels since information may not be reclassified once it has been declassified and released to the public under**

**FOR OFFICIAL USE ONLY**

**proper authority.**

The Freedom of Information Act (FOIA) provides a means for the public to request information from the U.S. Government. Where possible, the information will be provided. However certain information is exempt from disclosure. A list of exemptions is found in DoD 5400.7-R, "DoD Freedom of Information Act Program."

7. Web Sites. Information posted on any unclassified web site must comply with requirements stated in DepSecDef memorandum, "Web Site Administration," December 7, 1998, as amended (<http://www.defenselink.mil/webmasters>). Prior to posting, the potential for increased sensitivity due to electronic aggregation with other information or by volume must be considered. This document and other information exempt from disclosure when requested under the FOIA will not be posted to public web pages or web pages with access restricted only by domain or IP address (e.g., .mil restricted).
8. Foreign Disclosure. Any disclosure to foreign officials of information classified in accordance with this guide shall be in accordance with the procedures set forth in National Disclosure Policy or other established agreement(s). Special procedures are established to guide operational units in the release of information to their coalition partners (see Appendix E).
9. Definitions. See Appendix F.
10. Identification. Information will be assigned classification levels as defined in Section 1.3 of EO 12958 (also see Section 3, DoD 5200.1-R). Classified information found in open sources should not be assumed to be unclassified since it might directly impact on national security. Only information that is owned by, produced by or for, or is under the control of the U.S. Government can be designated as national security information. U.S. controlled information includes that related to vulnerabilities that may be exploited and result in direct impact on the national infrastructure.
11. Reason for Classification. Classification is reserved for specific categories of information or the compilation of related information. As defined in EO 12958, the following categories of information are applicable and referenced in appendices. This guide includes original decisions and guidance on derivative information. Appendices B and C reflect the reason for classification only for original determination.

**FOR OFFICIAL USE ONLY**

Section 1.5	Category	Applicability
a	Military plans, weapon systems, or operations	Original determination
b	Foreign government information	Derivative
c	Intelligence activities (including special activities), intelligence sources or methods, or cryptology	Derivative
d	Foreign relations or foreign activities of the United States, including confidential sources	Original determination
e	Scientific, technological, or economic matters relating to the national security	Original determination
f	United States Government programs for safeguarding nuclear materials or facilities	Original determination
g	Vulnerabilities or capabilities of systems, installations, projects or plans relating to the national security	Original determination

12. Classification by Compilation. Compilation of items of information, although individually unclassified, may require classification if the compiled information reveals an additional association or relationship meeting the standards for classification. If this occurs, care must be taken to specify the conditions that led to this decision.<sup>2</sup>
13. Derivative Classification. “Derivative classification” is the incorporating, paraphrasing, restating or generating in new form, information that is already classified and marking the newly developed material consistent with the classification markings that apply to the source information. The newly created materials can be classified higher than the source materials when compiled with other data, but can never be classified lower. As a general rule, all markings and dissemination controls shall be carried forward.
14. Goal, Mission and Purpose. Operation ENDURING FREEDOM is the name associated with the war on terrorism outside the United States. Operation ENDURING FREEDOM initially comprises the combat operations, and support to those operations, directed against the Al Quada terrorist organization and the Taliban government of Afghanistan. The purpose and goal of Operation ENDURING FREEDOM is to eliminate global terrorism. Classification guidance specific to Operation ENDURING FREEDOM can be found in Appendix B.

---

<sup>2</sup> Examples of compilation may include the listings of frequency assignments related to an operational mission; data related to investigations; listing of critical infrastructure locales which may be vulnerable when compiled, etc.

**FOR OFFICIAL USE ONLY**

Operation NOBLE EAGLE refers to U.S. military operations in support of homeland defense and civil support to federal, state and local agencies in the United States. The goal and purpose of Operation NOBLE EAGLE is to deter future terrorist attacks within the United States and to assist with the recovery from the September 11, 2001 terrorist attacks in New York, Washington, D.C, and Pennsylvania. Refer to Appendix C for classification guidance specific to Operation NOBLE EAGLE.

15. Special Handling and Procedures. Modifications to current safeguarding procedures established by DoD 5200.1-R include:

(1) Classified meetings and conferences are restricted to cleared U.S. Government and U.S. Government contractor facilities.

(2) Release of information to coalition partners will be clearly marked on all documents, orders, and information. E.g. message traffic will be marked Secret/Rel to (name of country)

16. OPSEC. Operations Security (OPSEC) requires heightened attention to include guarding against transmitting sensitive or classified information by telephone, cell phone, pager, fax machine, or other electronic devices, as well as carefully evaluating the potential impact of information released on websites and in press releases. All OPSEC and Web Site Administration policies remain in effect.

17. Marking Requirement. Documents and other products will be marked in accordance with DoD 5200.1-PH, "DoD Guide to Marking Classified Documents." Documents will be derivatively classified with this security classification guide used as the source. Markings shall reflect the following:

Derived From: Operation ENDURING FREEDOM and Operation NOBLE EAGLE SCG,  
Dtd

Declassify On: <see the date/event stated in the declass column of Appendix B or C as appropriate>

When using multiple sources, include a listing of the sources with the original record copy of the document.

18. Declassification Guidance. At the time of original classification, the OCA will determine a date or event on which the information will be declassified. The OCA may exempt specific information from declassification requirement if the release of information could damage
